

Call for Proposals

No. 44

15 July 2020

Priority Programme “Atmospheric and Earth System Research with the High Altitude and Long Range Research Aircraft (HALO)” (SPP 1294)

Within the Priority Programme “Atmospheric and Earth System Research with the High Altitude and Long Range Research Aircraft (HALO)” (SPP 1294), proposals are called for projects (up to three years duration) starting from 2022 (“HALO 2022”). An earlier start of funding is not possible.

HALO plays a key role in atmospheric research in Germany. It is a state-of-the-art airborne platform specifically equipped with modern in-situ and remote sensing instruments. HALO enables forefront Earth System science and allows for innovative atmospheric and geophysical measurements with an impressive high ceiling altitude of up to 15 km, and a spatial endurance of about 10,000 km. It may carry an instrumental payload of up to 3 tons and can be used to study processes within the troposphere and lower stratosphere. HALO-based research is supposed to help understand the interaction of processes within the Earth System and human activities, which are highly relevant for the society. For satellite missions, HALO provides unique possibilities to combine and validate space-borne data with measurements of the atmosphere that were performed in situ and near the ground.

Funds provided within the Priority Programme help to develop high-tech sensors and instruments, and to implement them for atmospheric studies. HALO enables Earth System research on a high international level. Main foci of the scientific investigations are:

- sources, properties and processing of aerosol particles,
- formation, evolution and radiative effects of clouds and precipitation,
- transport and dynamics in the Troposphere and lower Stratosphere,
- transport and transformation of chemical composition, and
- atmospheric coupling processes.

Proposals must be submitted to the DFG by **23 October 2020**. Please indicate in the abstract of your proposal the related HALO mission(s), if applicable. Please note that proposals can only be submitted via elan, the DFG’s electronic proposal processing system. To enter a new project within the existing Priority Programme, go to “Proposal Submission – New Project/Draft Proposal – Priority Programmes – SPP 1294/7”. Applicants, who already are funded and will apply for a renewal proposal have to submit their application via “Proposal Submission – Proposal Overview/Renewal Proposal”. Your current funded project(s) will be displayed.

All proposals have to be written in English and prepared according to the programme guidelines (form 50.05, section B) and the proposal preparation instructions (form 54.01). These forms can either be downloaded from our website or accessed through the elan portal.

Applicants without an existing elan-account must be registered in elan prior to submitting a proposal to the DFG. If you have not yet registered, please note that you must do so by **9 October 2020** to submit a proposal under this call; registration requests received after this time cannot be considered. You will normally receive confirmation of your registration by the next working day. Note that you will be asked to select the appropriate Priority Programme call during both the registration and the proposal process.

Further Information

Detailed information about the infrastructure Priority Programme is available at:
www.halo-spp.de

Website for information about the research aircraft HALO:
www.halo.dlr.de

The elan system can be accessed at:
<https://elan.dfg.de>

DFG forms 50.05 and 54.01 can be downloaded at:
www.dfg.de/formulare/50_05
www.dfg.de/formulare/54_01

Content issues related to the Priority Programme can be addressed to its coordinators:
Prof. Dr. Manfred Wendisch, Universität Leipzig, Fakultät für Physik und Geowissenschaften, Leipziger Institut für Meteorologie, Stephanstr. 3, 04103 Leipzig, phone +49 341 9732851, m.wendisch@uni-leipzig.de
Prof. Dr. Joachim Curtius, Goethe-Universität Frankfurt, Fachbereich Geowissenschaften/Geographie, Institut für Atmosphäre und Umwelt, Altenhöferallee 1, 60438 Frankfurt/Main, phone +49 69 79840258, curtius@iau.uni-frankfurt.de

Questions on the DFG proposal process can be directed to:
Programme contact: Dr. Tim Haarmann, phone +49 228 885-2328, tim.haarmann@dfg.de
Administrative contact: Pia Schmidgen, phone +49 228 885-2034, pia.schmidgen@dfg.de
